

Value Education - 2

class summary

17th Jan, 2023

- In the previous class of value education which took place on 17th of Jan, 2023, professor first asked us to read the 1st part (Chapter 1) named Understanding value education.
- She introduced the topic of human values and emphasized the informal discussions that often occur in various setting about the importance of values in family, society & public domain. The goal was to encourage students/participants to reflect on what constitutes a fulfilling life and to consider the universal aspects of value education what contribute to personal & collective happiness.
- The discussion started with the idea of a fulfilling life, encompassing elements such as happiness, physical health, prosperity, harmonious & healthy relationships, peace in society, environmental sustainability and understanding one's own reality and existence.

- The complementarity of values and skills was also discussed, emphasizing that skills are a means to achieve a purpose and the importance of aligning skills with positive values.
 - The class noted the priority of values over skills and discussed the potential consequences of using skills without clear understanding of values.
 - Overall, the ~~cat~~ class aimed to initiate a thoughtful reflection on human values, their role in educⁿ, and their impact on individual and collective well being.
-
